Languages: Javascript, jQuery, Node, MySQL, Sequelize, MongoDB, HTML5, CSS3, Bootstrap, Materialize, Handlebars.js, Express

PROJECTS

Griffin-Oskar<https://github.com/lilipcohen/Griffin-Oskar><https://lilipcohen.github.io/Griffin-Oskar/>

- A site for fans, labels, and management to get information about the artist, Griffin Oskar, and for the artist to have a space to display their most recent activity.
- Translate the artist's aesthetic to their website using styling and frontend javascript functionality. Developing bandsintown API javascript usage.
- Materialize, CSS, HTML, Javascript, JQuery, mailchimp API, bandsintown API

Northwest-Veg<https://github.com/lilipcohen/Northwest-Veg><https://northwest-veg.herokuapp.com/>

- A website for Senior residents and Senior resident facilities seeking vegan recipes, resources on nutrition, shopping lists, and information on healthy facilities. This website includes a form for facilities to fill out and send to North Veg for approval on their nutritional practices for their resident to then be posted for recommendation to users looking for healthy facility options.
- Implement backend Edamam API throughout the website and frontend handlebars setup associated with the API.
- Handlebars, Materialize, CSS, Javascript, JQuery, Edamam API, Node, Express

Burger<https://github.com/lilipcohen/burger><https://devour-burgers-yum.herokuapp.com/>

- An app that a User can create different "burgers" that they wish to eat and then devour.
- Enable all functionality and styling to the app including the database, HTML files, styling, and both back and frontend requirements.
- CSS, HTML, Javascript, JQuery, MySQL
